

Rocks in Maine

lyrics by Ms. Dulac's 3rd grade class, Hope Elementary School, Hope, ME
Music by Scot Cannon
Copyright 2017

Silver gold and diamonds,
All can be found.
Inside of rocks,
or lying on the ground.

Minerals and rocks,
from the state of Maine.
I collect them all,
none of them the same.

Geods are my favorite,
crystals are inside.
Sparkle and they glow,
when you shine a light.

Find them in a cave,
Buy them at the store.
They have layers of color,
Want to buy some more.

Under the ocean sedimentary rock,
Limestone, sandstone, flint and chalk.
Metamorphic rock from pressure or heat,
marble and slate take time to complete.
Igneous rock, when lava cools,
obsidian stone makes weapons and tools

Sedimentary layers,
can be broke apart.
Some look like a sandwich,
Some can look like art.

Igneous rocks,
find them on the ground.
Comes from a volcano,
after it cools down.

Minerals and rocks,
from the state of Maine.
I collect them all,
none of them the same.
