

Sustainable Industries

lyrics by Mrs. Curtis's 4th Grade class, South School, Rockland, ME

Music by Scot Cannon

Copyright 2017

Global change, waters warm,
lobsters move north, not the norm.
Lobstermen, need some help,
turn to clams, and farming kelp.

We use kelp, every day,
in toothpaste, and mayonnaise.
Kelp is red, brown or green,
in shampoo, and ice cream.

Keep marine industries sustainable,
because our environment is changeable.
Warming waters from global change,
makes coastal industries, hard to sustain

Cobble is, where lobsters hide,
made of rocks, they stay inside.
Red, brown, blue, orange and black,
Halloween colors, what a mask.

Lobstermen, must throw back,
lobsters too small, from their traps.
Bearing eggs, a female,
release her, V- notch her tail.

Swimmerets, crusher claw,
lobster parts, here's some more.
Antenna, abdomen,
mandible and telson.

Keep marine industries sustainable,
because our environment is changeable.
Warming waters from global change,
makes coastal industries, hard to sustain.

All of our, coastal industries,
it's our future and our history.
Sustainable industries,
they are best, for you and me.

Keep marine industries sustainable,
because our environment is changeable.
Warming waters from global change,
makes coastal industries, hard to sustain.

Makes coastal industries, hard to sustain.
